COMPANY PROFILE

Securrent ME is a Trusted Cybersecurity Partner of Yours!

BENEFITS OF WORKING WITH SECURRENT ME

Securrent ME is a trusted cybersecurity partner of yours in Dubai, providing state-of-the-art technology solutions and reliable services since 2017. Fueled by the decades of security expertise from its parent company, Cyberwise, Turkey's pioneer cybersecurity solutions provider, Securrent ME offers a comprehensive portfolio of consulting, network and data security solutions, threat and vulnerability management services, and managed security services.

Securrent ME serves a global client base from diverse industries such as finance, energy, logistics, oil and gas. It has built strategic alliances with leading technology vendors that encompass business and technical expertise to meet your needs in an ever-changing threat landscape.

Get access to **Customer-centric Experts**

Tailored solutions for your individual needs

Best-in-class products from **Leading Technology Vendors**

Fueled by a **Global Organization**

THREAT DETECTION AND VULNERABILITY MANAGEMENT

We provide threat detection services to identify the misconfigurations, security errors and vulnerabilities on your system, before the attackers. Our elite experts conduct testing manually to prevent any impact on your systems. With this approach, security audits could be completed without any down time.

With our 30 years of experience combined with international standards such as OWASP and accreditations such as CREST our team follows the best and the latest methodologies and practices them while conducting the tests.

Our Threat Detection Services fall under three categories:

Penetration Testing	Red Teaming	Purple Teaming
The best way to over-come the attackers is to be one step ahead from them. Our elite testers simulate real-world attacks on your systems to reveal the vulnerabilities an attacker could exploit.	With an attacker-like approach we aim to gain access to local network or critical data. Different than the other tests, while doing red teaming, our goal is to not to trigger any alarms to see how successful a real attacker would be.	Purple teaming is where; our red team engages with your blue team to provide you the most meaningful output from our test. Furthermore, we take this approach to our application penetration testing and team up with your developers, to directly show them the errors and how to fix them.

bizzy
Vulnerability Prioritization Platform

- **Comprehensive Cyber Risk Visibility**
- **Visualization of Cyber Risks**
- **Focus on Real Threats**
- **Efficient Use of Resources**
- **Performance Tracking & Measuring**

Decentralized Risk and Vulnerability Management is a challenging process that requires resource, time and continuous follow-up. Bizzy aggregates vulnerability data from multiple sources, prioritizes risks and enables organizations to take immediate action by aligning resources based on risk exposure criticality.

Leading companies in the largest industries are using Bizzy to aggregate, prioritize and track the vulnerabilities so that they can focus on what matters most.

IDENTITY & ACCESS MANAGEMENT

Cyberark

CyberArk is the global leader in privileged access management, a critical layer of IT security to protect data, infrastructure and assets across the enterprise, in the cloud and throughout the DevOps pipeline. CyberArk delivers the industry's most complete solution to reduce the risk created by privileged credentials and secrets. The company is trusted by the world's leading organizations, including more than 50 percent of the Fortune 500, to protect against external attackers and malicious insiders.

Securrent ME is a Gold Partner of Cyberark.

SailPoint

SailPoint is the leader in identity security for the cloud enterprise. The company's identity security solutions secure and enable thousands of companies worldwide, giving the customers unmatched visibility into the entirety of their digital workforce, and ensuring that each worker has the right access to do their job, no more, no less. With SailPoint at the foundation of their business, the customers can provision access with confidence, protect business assets at scale and ensure compliance with certainty.

Securrent ME is a Gold Partner of SailPoint.

APPLICATION SECURITY

Codethreat

CodeThreat is a Static Application Security Testing (SAST) solution that uses scientifically proven techniques with approximation to analyze a codebase at rest, collects security related information, calculates data flows, searches for various well-known security weaknesses and as a result produce claims which are usually whether the targeted codebase is vulnerable to scoped weaknesses or not. CodeThreat statically tests your code and helps you locate, prioritize and mitigate security weaknesses.

Securrent ME is a Gold Partner of CodeThreat.

Fortify

Micro Focus' Fortify has built an unparalleled Application Security Testing solution that fits in seamlessly with how developers work and generates real value for developers with its ease of use and significant time-saving features. Fortify can be integrated at every step of the SDLC, which leads to less vulnerabilities, reduced fixes to older code, lower costs and, most importantly, far more secure applications.

Securrent ME is a Gold Partner of Micro Focus.

NEXT GENERATION NETWORK SECURITY

Check Point

Check Point is a leading provider of cyber security solutions to governments and corporate enterprises globally. Its solutions protect customers from 5th generation cyber-attacks with an industry leading catch rate of malware, ransomware and other types of attacks. Check Point offers multilevel security architecture, "Infinity" Total Protection with Gen V advanced threat prevention, which defends enterprises' cloud, network and mobile device held information. Check Point protects over 100,000 organizations of all sizes.

We are the only 5 Stars and MSP Partner of Check Point in the Middle East Region.

Cisco

Cisco have integrated a comprehensive portfolio of security technologies to provide advanced threat protection. Next generation intrusion prevention systems (IPS), secure access systems, security analytics, and malware defense. All this is backed by in-depth threat and malware intelligence. Cisco leads the way with solutions that are driving the industry in SASE, XDR, and zero trust. Integrating it all is Cisco SecureX, the security platform that provides simplicity, visibility and efficiency across your security infrastructure.

Securrent ME is a Security Specialization Partner of Cisco.

DATA SECURITY

Thales

Thales provides everything an organization needs to protect and manage its data, identities and intellectual property and meet regulatory compliance – through encryption, advanced key management, tokenization, privileged user control and meeting the highest standards of certification for high assurance solutions. More than 30,000 organisations already rely on Thales solutions to verify the identities of people and things, grant access to digital services, analyse vast quantities of information and encrypt data. In early 2019, Thales acquired the international security company, Gemalto and have combined it with the existing digital assets to create a new leader in digital security.

Securrent ME is a Gold partner of Thales e-security.

Forcepoint

Purpose-built and ready to protect, Forcepoint is driven by an understanding of human behavior and intent. Forcepoint's innovative technology, decades of experience and clear vision help solve critical security issues to protect employees, business data and IP. Forcepoint offers a systems-oriented approach to insider threat detection and analytics, cloud-based user and application protection, next-gen network protection, data security and systems visibility. It's a new approach to cybersecurity never seen before.

Securrent ME is a Platinum Partner of Forcepoint.

SECURITY OPERATIONS

BACKBOX

indeni

Backbox

As the leading Intelligent Automation platform, BackBox is changing the way organizations manage and monitor their Security and Network infrastructure. Offering a single, centralized solution to manage all security and network devices, the BackBox solution automates all operational activities including orchestration, backup, recovery, asset management, security audits and capacity optimization for over 180 technology vendors ensuring an improved security posture by enhancing operational efficiencies, infrastructure reliability and visibility while reducing overall risk.

Securrent ME is a Gold Partner of Backbox.

Indeni

Indeni is the leader in Security Infrastructure Automation and Native Cloud Infrastructure Security. It pioneered a new way to manage security infrastructure and IaC by providing the world's best practices, automated. Leading enterprises trust Indeni to protect their network reliability and data security, including two of the world's largest credit card issuers, financial auditors, government agencies, hospital networks, and many others.
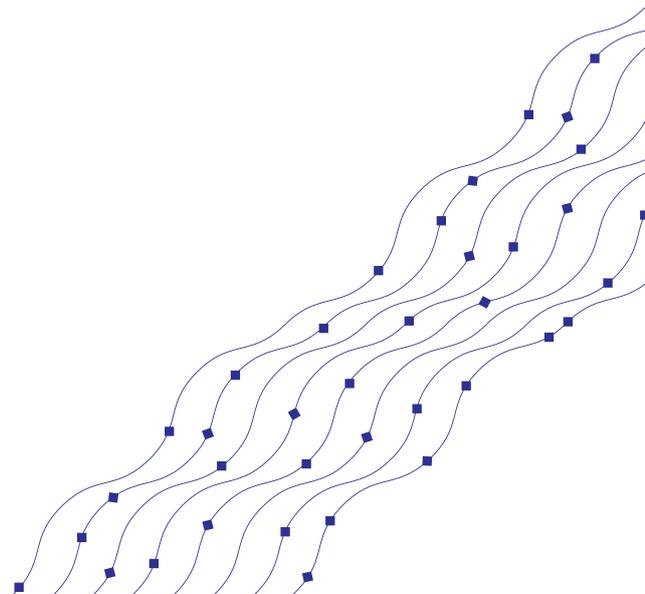

Securrent ME is a direct Partner of Indeni.

tufin

Tufin

Tufin is a network security company specializing in the automation and acceleration of network infrastructure changes while improving security and compliance. The Tufin Orchestration Suite supports next-generation firewalls, network layer firewalls, routers, network switches, load balancers, web proxies, private and public cloud platforms and software-defined data centers.

Securrent ME is a Gold Partner of Tufin.

WISER SOLUTIONS
FOR A SECURE WORLD

SECURRENT ME IS NOW A PART OF CYBERWISE GROUP COMPANIES

Cyberwise Group, with over 200 employees located in Ankara, Istanbul, İzmir, Dubai, and Amsterdam is committed to delivering unmatched customer experience and excellence in services provided to over 750 enterprise customers.

As a pioneer cybersecurity solutions provider, Cyberwise has a holistic approach to cybersecurity including IT, OT, and Cyber Physical Systems (CPS). The Company with its "one-stop-shop" business model offers technical support services for best of breed products from leading global technology vendors, consulting, auditing (incl. PCI-DSS and penetration testing) and managed security services to enterprises in diverse industries, such as Finance, Telecommunications, Manufacturing, Energy and Government.

This dynamic brand has been built over the legacy of leading cybersecurity companies, Biznet & Securrent and revolutionized the market by creating the first cybersecurity merger in Turkey. Cyberwise accelerated its regional growth plans consequent to the private equity fund, Taxim Capital's investment. Through that notion Cyberwise has recently acquired Innovera, one of the major players in the cybersecurity market and leveraged its strategic goal of becoming a regional leader.
